

# INSPIRATION AND TRANSFORMATION

## SEMINAR WEEK

### BUILT HERITAGE & UPCYCLING

*Julia Kick, Nina Beck*

In our seminar week, we focus on the specific task with a vision. Together we will explore positive examples in the Rhine Valley and neighboring Switzerland in order to gain valuable insights for dealing with existing structures.

The focus is on both urban concepts and built architecture that offer inspiring solutions for sustainable, open design approaches.

We will spend time together on our daytrips as well as on a two day trip to Switzerland and take the experience gained back to Dornbirn for an intensive workshop on site.

What we have seen can be incorporated directly and practically into concrete designs.
