

Gamprin, After the Last Truck

Advanced Studio
Summer semester 2026

UNIVERSITÄT
LIECHTENSTEIN

LSA Liechtenstein School of Architecture
Urban Design and Spatial Development Unit

Eschner Strasse in Gamprin is currently shaped by intense car and truck traffic crossing Liechtenstein, functioning more as an infrastructure corridor than a place to live. The planned construction of a new bypass will completely remove through-traffic, opening a unique opportunity to rethink the street as a vibrant neighborhood axis. At a moment of major growth and historical change for the small municipality of Gamprin, the project reimagines Eschner Strasse as a mixed-use urban space where active and inhabited ground floors support everyday life and social interaction. The studio explores how densification, the requalification of existing buildings, respect for local landmarks, and social integration can be carefully balanced to create a lively and inclusive urban environment. Developed in close collaboration with the municipality of Gamprin, the project allows students to engage directly with real urban challenges and concrete transformation processes.

Tutors: Oscar Buson, Felix Ledergerber, Design Studio,
optional compulsory, 16 ECTS, German/English, 144 Lessons
(+ 372 h self study time), Wednesdays and Thursdays, 8:30
a.m. to 4:45 p.m. in the studio, introduction on February, 5th
2026 at 2:00 p.m., minimum 75% compulsory attendance,
continuous assessment, midterm and final reviews. Relevant
reading will be made available at the beginning of the course.
A list of recommended literature will be announced in the
course and updated on an ongoing basis.
